

JAYEOLA TAIWO ELIZABETH

Lagos, Nigeria | 07026691684 | jayeolataiwoelizabeth@gmail.com | github.com/jayeolataiwo-dev

PROFESSIONAL SUMMARY

Frontend development-focused psychology undergraduate with hands-on experience shipping a production web app using HTML, CSS, and JavaScript, complemented by an AI-assisted engineering internship where I directed AI tools to implement advanced features and hand-built accessible UI components. Strong communicator with a background in customer-facing and small-business operations, bringing organization, problem-solving, and follow-through to technical work.

SKILLS

- **Core:** HTML, CSS, JavaScript (Vanilla), Git & GitHub, Responsive Design
- **AI-assisted development:** directing AI coding tools (Claude, ChatGPT) to implement features, verifying AI-proposed code against documentation, debugging AI-generated code
- **Exposure through capstone work:** Next.js, React, TypeScript, Tailwind CSS, accessible UI patterns (WAI-ARIA)
- **Other:** communication, teamwork, customer service, time management.

PROJECTS

Spectranet Redesign — Capstone Project

[Live site](#) | [Code](#)

- A frontend redesign concept for Spectranet's self-care web app, built as the capstone for FlyRank AI's frontend engineering internship.
- Built HTML/CSS/JS foundations myself; directed AI tools to implement the Next.js/TypeScript app, an AI streaming support-chat feature, and a 3D interactive product viewer.
- Hand-built three accessible UI components (Modal, Tabs, Disclosure) against WAI-ARIA patterns — full keyboard support and focus trapping, no component library.
- Found and fixed real bugs surfaced during AI-assisted development, including a broken CI pipeline and a focus-tracking issue in the Tabs component.

Joke Booth

[Live site](#) | [Code](#)

- A playful joke generator built with vanilla HTML, CSS, and JavaScript — pulls from public joke APIs across multiple categories, with a copy-to-clipboard feature and a distinct cartoonish visual style.

EXPERIENCE

AI Frontend Engineering Intern — FlyRank AI (Remote), Jul 2026 – Sep 2026

- Completed a self-paced frontend engineering track building a real capstone product using AI coding tools as a daily workflow.
- Practiced structured AI collaboration: verifying AI-proposed code against live documentation rather than accepting it on trust, and comparing vague vs. precise prompts to see how each affected code quality.
- Documented the build process, technical decisions, and known limitations in project write-ups.

ADDITIONAL EXPERIENCE

- **Sales Representative, Bola Ventures Limited (2021–2025)** — customer service and daily sales support.
- **Owner & Baker, Teebakes Cakes and Pastries (2023–2026)** — order management, pricing, and client communication.

EDUCATION

B.Sc. Psychology — University of Lagos, Nigeria, 2023 – 2027

- Maintaining a strong academic standing.
- Led a group academic project and coordinated team activities successfully.
